Discuss LGBTQ+ is a brand new resource designed to start positive discussions around LGBTQIAP+ topics and issues, especially with youth and community groups.

LGBTQIAP+ stands for Lesbian, Gay Bisexual, Trans, Queer/Questioning, Intersex, Asexual/Aromantic, Pansexual, and all other queer identities.

This book has been designed to help you have real conversations with others around sexuality and gender.

The book has 100 different questions (some serious, some less so). They can be worked through with a friend or with a group.

These questions are intended as discussion starters. Whether everyone participating is in agreement on an answer or not, try and use the questions as an opportunity to think about the topics more deeply, or from a different perspective. Remember that these topics can be emotional and difficult for some people to talk about. Be sensitive to others' feelings, and try and keep the discussions kind, balanced, and respectful.

The 100 questions have been split into four categories within the book. Below, you can find:

- a list of all the questions
- advice around each category
- how to approach the questions in the app

Remember – if there are any terms you are unfamiliar with, please consult the Rainbow Glossary.

# Facilitator's Notes

If you are facilitating these discussions, it's important to be aware of some issues that may arise. Here are some tips to help you:

- Establish some qualities or values that you will all promise to keep, e.g. kindness, respect, confidentiality
- Be aware of microaggressions - the subtle, everyday put-downs and insults that people of colour, women, LGBTQ+ people, disabled people, and others who are marginalised experience day-to-day.
- Explain to the group beforehand that you might pause a conversation if two sides in disagreement get too heated, and that people can ask for the conversation to be paused if it's getting too much. Allow people plenty of time before conversations restart, even if that means coming back to it another day.
- Make it clear that you will not tolerate hate speech, bullying, or aggression during these conversations, even during disagreements.

You can find more helpful information and advice in The Trevor Project's Safe Space Guide (link on our website)

# Religion and Discrimination

These questions are probably the toughest in the pack. Remember that for people on both sides of the argument, this can be very emotional to talk about. Try and use these questions to encourage healthy debate, but be aware that the conversation may become one-sided, and people could feel under attack. Please see the Facilitator's Notes on page 46.

# Gender and Intersectionality

These gender and intersectionality-related questions are important to discuss even if they appear not to apply to anyone involved in the discussion.
